## Acknowledgements

This Internal Audit Training of Trainers (IA ToT) Program is developed under the Strengthening Accountability and the Fiduciary Environment (SAFE) Program by a team co-lead by Arman Vatyan, Senior Financial Management Specialist, the World Bank and Kalina Shukarova – Savovska, Senior Financial Management Specialist, CFRR, the World Bank and including Jean-Pierre Garitte, Consultant, the World Bank. The team expresses its appreciation to the participants of the SAFE IA ToT Community of Practice for their participation and contribution in delivering the IA ToT program.

## Introduction

The Internal Audit Training of Trainers (IA ToT) program aims to develop the capacity of the public sector internal auditors to deliver high-quality internal audit training within their countries/institutions, based on the International Standards for the Professional Practice of Internal Auditing (ISPPIA) and international good practices in public sector internal auditing.

The target participant group are auditors in the public sector who already have skills in internal auditing and are also extensively involved in training delivery in their respective countries and institutions. Participants are responsible to further disseminate the knowledge obtained through the IA ToT program locally by conducting replication workshops in their countries and institutions as well as contribute to the delivery of some sessions within the training modules and participate in sharing good practices among the members of the community of practice.

The approach and format of the IA ToT program is designed to be highly interactive and includes:

- A series of training sessions, both workshops and online sessions, aimed at developing the capacity of public sector internal audit trainers to deliver high-quality training and Continuing Professional Development (CPD) courses based on ISPPIA;
- Sharing experiences, audit documentation templates, tools and other resources. The integrated Internal Audit Case Study and the Simulated “Client File” Templates are the core teaching resources; and
- Facilitation of shared learning and peer exchange among countries in the region and members of the Community of Practice regarding the design, content, implementation arrangements, teaching and authorization environment for CPD.

The training session workshops have two streams: (i) Fundamentals stream with many practical case studies on simulated internal audit clients designed for the less experienced practitioner; and (ii) Advanced stream for the more seasoned internal auditor with a narrower focus and more involvement in more complex areas. In addition, shorter online sessions covering specialized topics will also be delivered.

## Online Sessions

Two online sessions follow each workshop and complement both the fundamentals and advanced streams. They are delivered to the members of the Community of Practice and also include an opportunity for greater outreach. The online sessions will include selected specialized topics (e.g. fraud or data analytics) based on participants identified topics of interest.
